About this version

New and Changed System Information

DTN Fuel Suite release has been scheduled for Tuesday, August 2nd, 2022, from 8:00 pm CT until 9:00 pm. The release includes maintenances and bug fixes, no outage is expected. However, there is always the possibility that some of the services might be impacted. This would include the services listed below.

- Allocation Tracker
- Data Connect
- Fuel Buyer
- Fuel Seller
- Fuel Admin
- Price Admin

Browser Recommendations

DTN products work with most common web browsers, however, we recommend using Chrome for optimal performance.

We recommend that you use the most current version of the browsers. With the most current version, our web pages display promptly, and you have the latest security updates

If you use an older or unsupported browser, some features may not work, or an application may not open.

If you are using the latest release of your browser, please be aware that there may be a delay in our support of the new browser release while we conduct a review to ensure it meets our internal security standard.

Fuel Seller Custom Index

A Fuel Seller Custom Index bug has been resolved. The issue impacted Custom Indexes associated with prices that span multiple time zones. If rack prices for eastern and central time zones are configured and associated with the same Custom Index, for instance, only prices in one of the time zones were created. This issue has been corrected so that prices for both time zones are created.

Data Connect Printing Issue

Data Connect had an issue printing certain files containing abnormally long text lines. This resulted in some of the text characters to not be included on the printed version of the file as they were cutoff. This issue has been resolved by switching to landscape format for these large files to ensure all characters are printed.
